STATEMENT OF REASONS FOR ALLOWANCE

1. A response under 37 CFR 1.111 was received on 12 December 2005. By this response, Claims 1, 2, 5, 9, 12, 15, and 16 have been amended. Claims 18-21 have been canceled. No new claims have been added. Claims 1-17 are currently under examination in the present application.

Allowable Subject Matter

2. Claims 1-17 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 1-17, and notably independent Claims 1, 8, and 15 are directed to systems, methods, and software implementations which include receiving requests from a client via a web page having frames, and if a request is received to load an object into a target frame which has a different owner than the requesting frame, then a new URL and redirect message are generated. The claims also provide for a load balancer and multiple servers hosting the web page, and for the redirection including automatically invoking the HTTPS protocol. Although the closest prior art, Shuster, discloses a system including load balancing functions and further including loading of documents from different URLs into frames of a web page, and other prior art, Subramaniam, discloses redirection of a request from HTTP to HTTPS protocol, neither Shuster or Subramaniam, alone or in combination, disclose the claimed conditions in which a new

URL and redirect message are generated *when a request is to load an object into a target frame which has a different owner than the requesting frame.*

Additional prior art, Beasley et al, US Patent 6965938, discloses a method for load balancing and further discusses of frame ownership issues; however, the method of Beasley requires opening additional windows and a circular method to prevent frame ownership from changing. Further, Hewett et al, US Patent 7000107, discloses "web components" in which the security state of a web page with frames is monitored and the frames are switched or replaced so that all frames of a page are either secure (HTTPS) or non-secure (HTTP); however, Hewett does not explicitly suggest performing the frame replacements based on a difference in ownership of the frames.

Therefore, the Claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
